YACHTS

PROJECT

Innovative and elegant, this motor yacht will give you a new yachting experience. Combining everything on board, modern design, eco-respect, comfort, user-friendliness, space, water access, safety and technology - nothing is missing.

ALIUM YACHTS was born from the concept of building high quality yachts with the least possible ecological impact. Based on this idea, we offer you a thoughtful, well-proven platform with multiple layout solutions. You choose one or create your own. Let's find the most stylish and clever solutions for an enjoyable summer at sea.

The partnership with our shipbuilder naval architect **META** was an obvious choice. Since 1963, over 400 Strongall aluminum and steel yachts built, 5 million nautical miles covered, more than 185 circumnavigations, and many exceptional sailors : Bernard Moitessier, Antoine, Philippe Poupon, Georges Meffre and more.

Thanks to the Strongall® assembly process, patented in 1977, and its unique know-how, **META** builds sailing boats, trawlers, speedboats and other floating structures in pre-stressed aluminum. These constructions are efficient, innovative, comfortable and very strong.

Our Designer partnership : **Valentin Design Sarl** based in Geneva. Why choose second-rate if we can work with the winner?

Valentin Weigand, Head of Design and Partner, won the 2020 Boat International Young Designer of the Year Award. Valentin Design instinctively understands your desires and converts your wishes into real proposals. Each exchange with them is a step closer to your yacht.

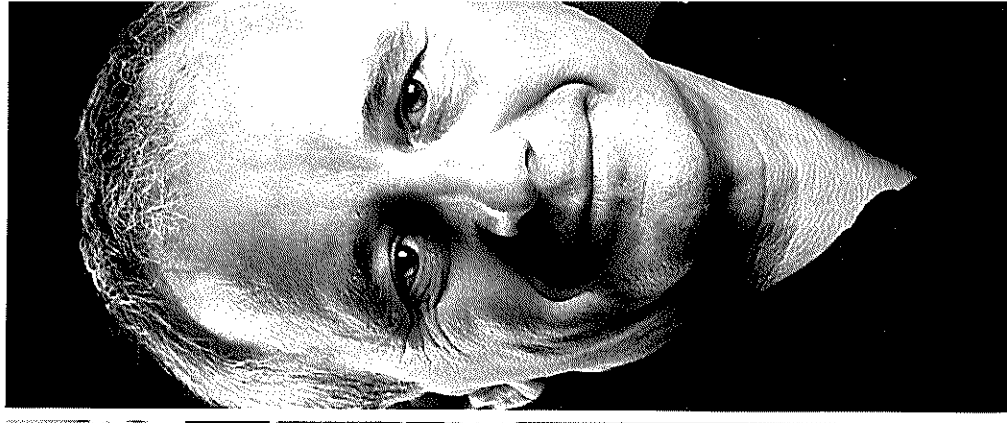

We came with a determined project comprising power, size, layout and general style, and their studio made it stylish and efficient without compromising our requirements.

Alexandre Louvier
Sales and Marketing, R&D
300 boats sold; worked for most renowned yacht brands

Christian Desbois
Construction Manager, R&D
1,500,000 charter guests transported;
owner of 6 passenger yachts

Alain Dutoit
Partnership Coordinator
runs more than 50 companies;
25 years in the industry

CHARACTERISTICS :

LOA : 12.77 m (42 ft)

Max beam : 3.99 m (13.1 ft)

Draft : 0.9 m (3 ft)

Min load disp : 8.5 t

Hull : Aluminium Deep V-planning

Fuel capacity : 1200 liters

Water capacity : 365 liters

PERFORMANCE :

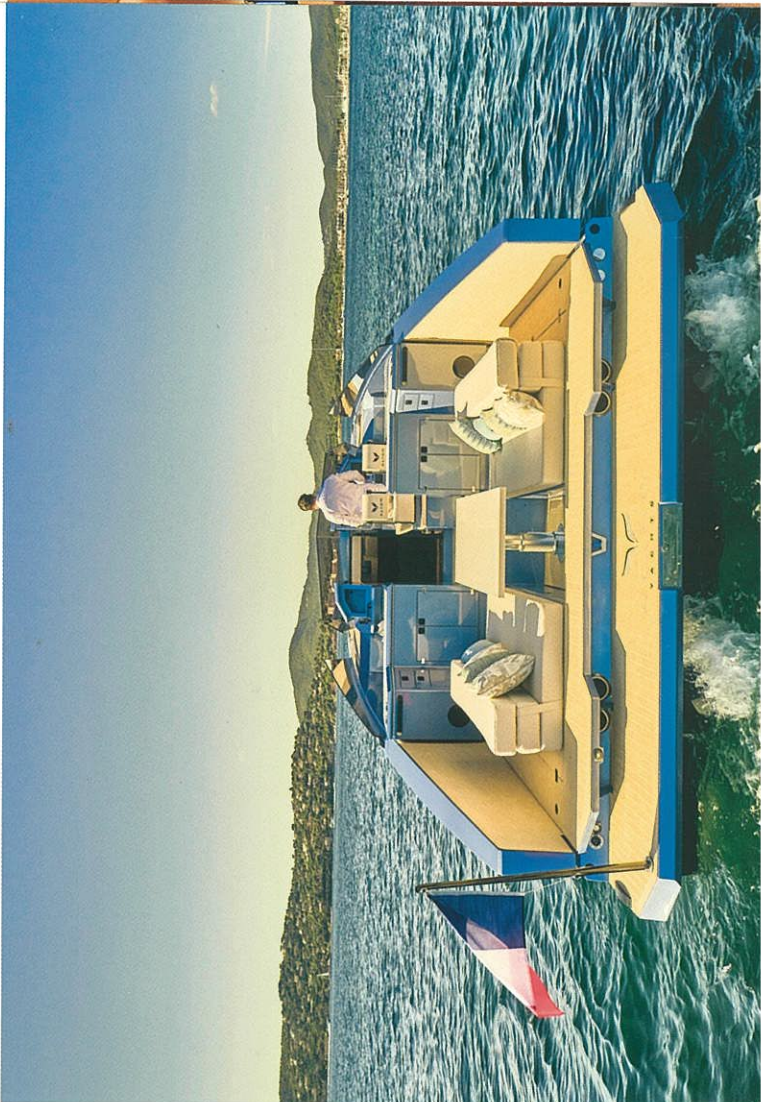

Max speed : 40 Knots

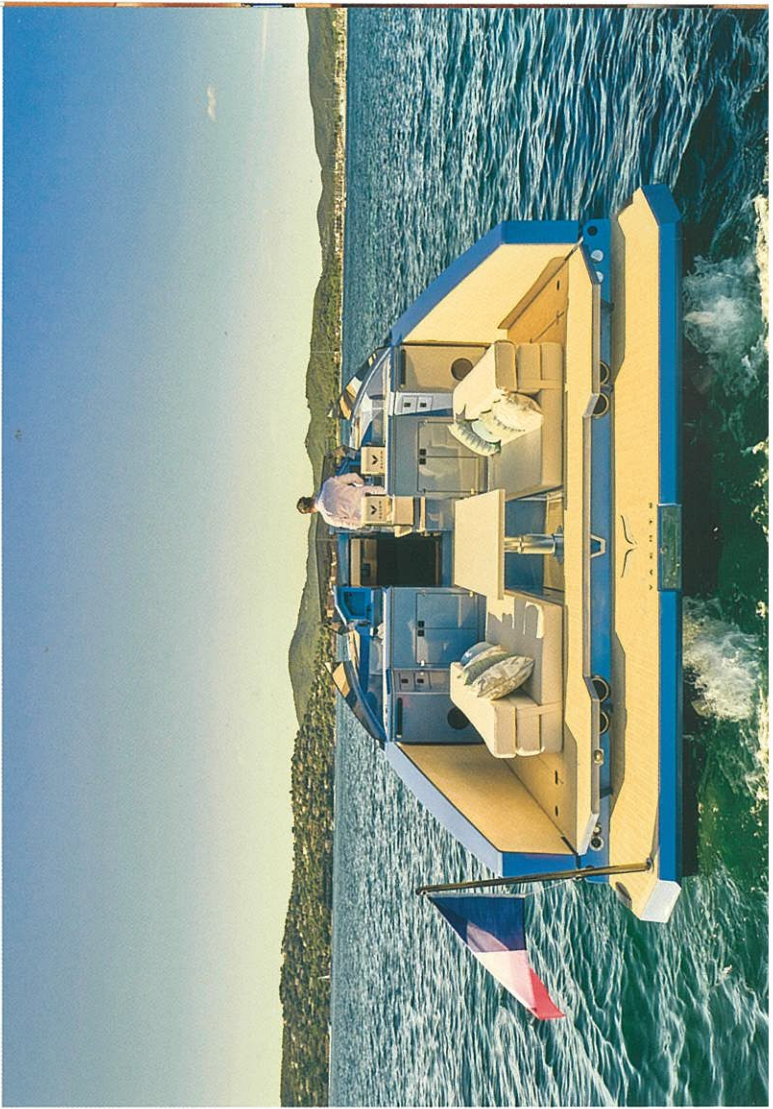

Cruise speed : 26 Knots

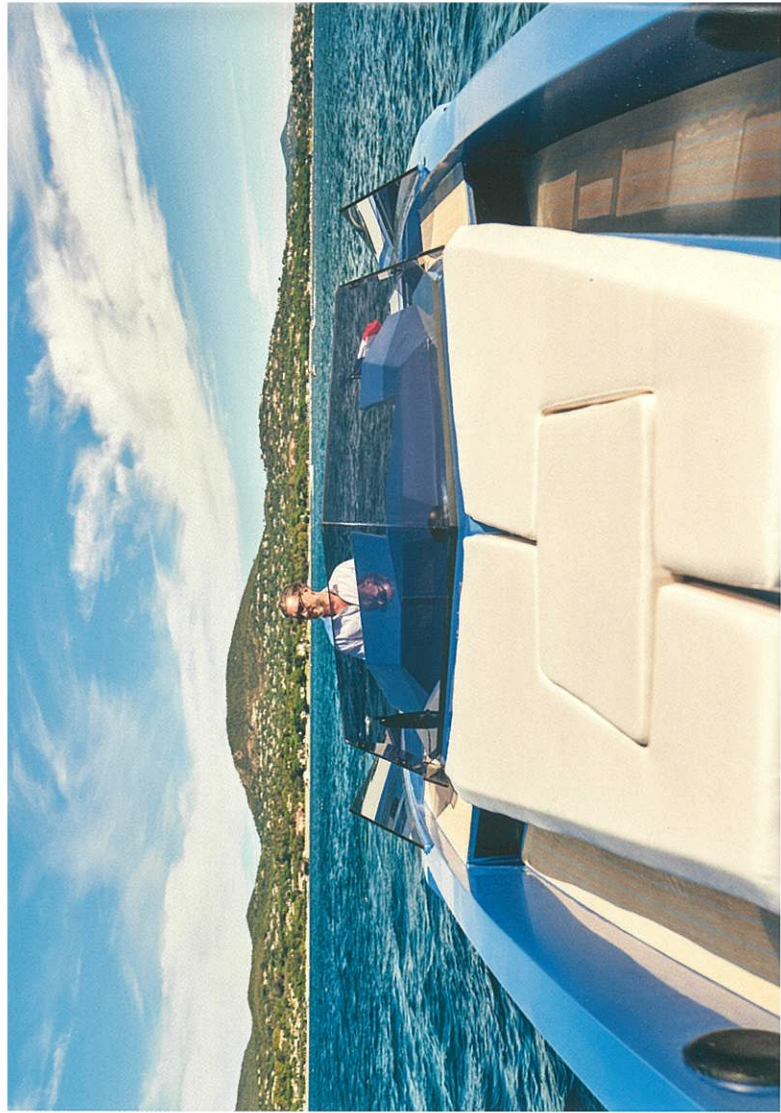

Fuel efficiency : 77 L/Hours @ 26 knots

Range : 370 Nm @ 26 knots
